CARE

Wipe with a soft, dry cloth once cool. No solvents.

NEED A HAND?

Write to **thelightheritagelondon@gmail.com** with your order number and a photo. We reply within one working day.

INSTALLATION · 5 STEPS

Switch off at the fuse box before you start. If you are not confident with wiring, use a registered electrician.

1. Switch off at the fuse box. Outdoor lights must be earthed and on an RCD.
2. Screw the backplate to the wall with rust-proof fixings, cable through the gasket.
3. Connect brown to L, blue to N, green/yellow to earth.
4. Run clear silicone along the top edge and cable entry.
5. Fit the glass or lantern, switch on.

Isolate at the fuse box before touching wiring. Keep this guide for future reference. Recycle electrical items and bulbs, never in household waste.
